Dear Sir or Madam,

We would really appreciate it if you would kindly remove the four dams around the Snake River. You should be more aware of the possibilities or what can happen if you don't remove the dams.

We think the dams should be taken away as soon as possible so that the lives of the fish don't remain in a critical position. We have wasted much money on the dams that were only killing fish instead of helping them to survive. If we moved the fish you would be saving and gaining money at the same time. If we don't remove them by the year 2017, most of all the salmon and steel head fish will be extinct.

One day our friend Joe went fishing and caught a fish that was dead only because he was trapped inside a tiny dam. Saving the fish in the Pacific Northwest is vitally important for the sake of the children who never had the opportunity to catch a fish before. You would understand what we are talking about if you saw a child's face after he or she caught their very own fish. This would remind you of life's perks.

Sincerely,

Jennifer Cymbala
